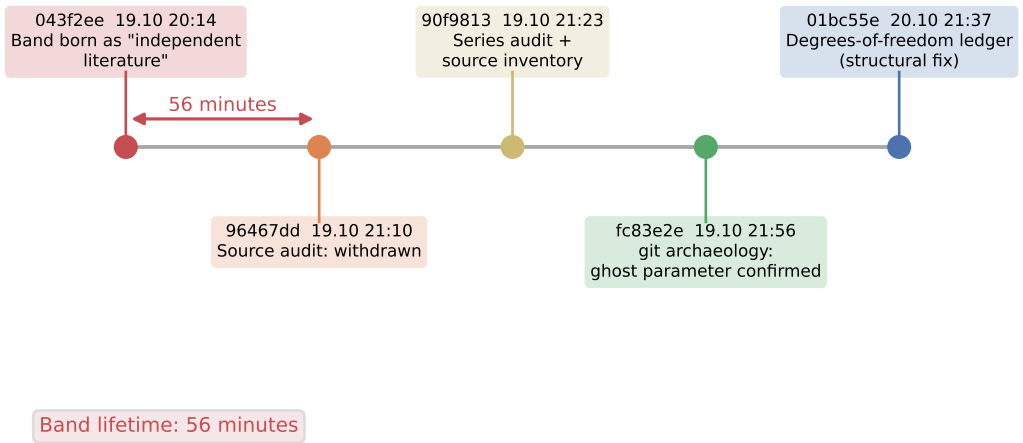
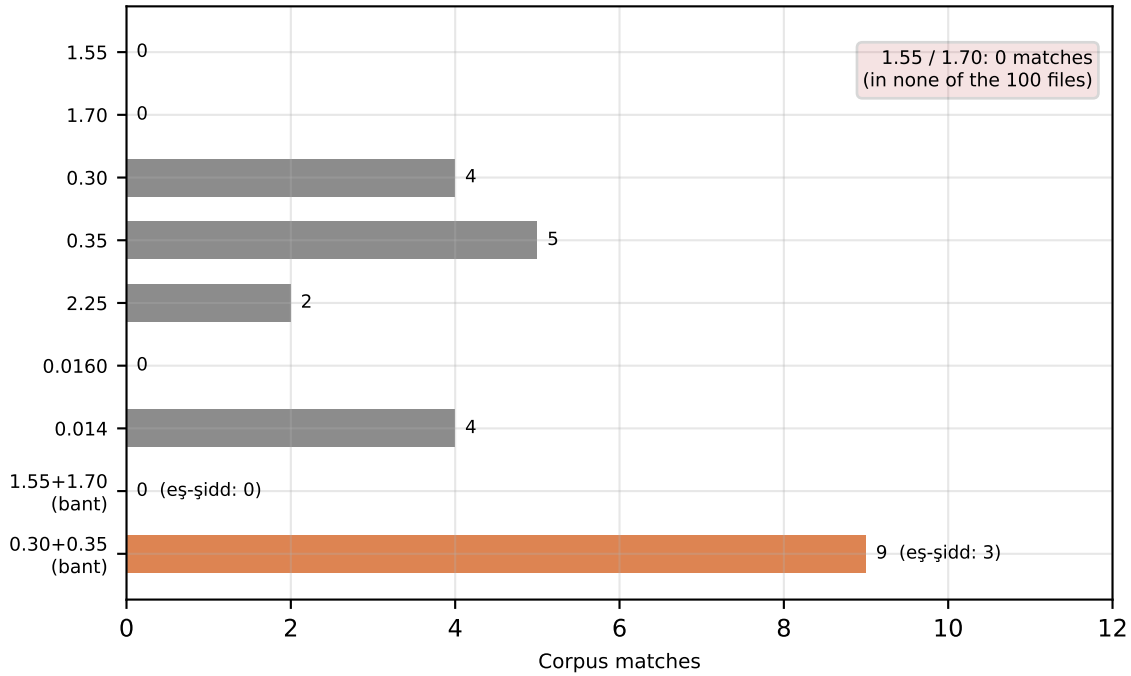
Ghost-Parameter Forensics: No Source, No Agreement

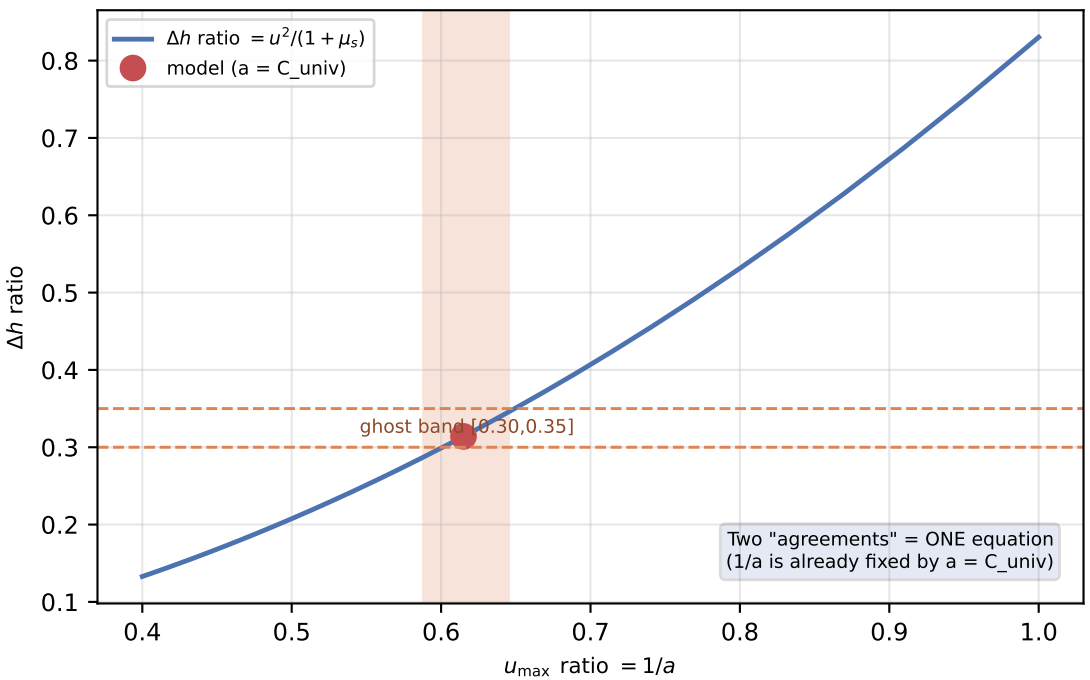
(a) Life cycle of the ghost band (git archaeology)



(b) Existence scan in the source corpus (100 files)



(c) Collapse of two "independent" agreements: one equation



(d) The six-step detection protocol

1. Cite a source line for every literature value
2. Does the source CONTAIN it? (not: is it right?)
3. Scan the arXiv LaTeX source (PDF is not enough)
4. git log -S: first appearance
5. Was the band recorded BEFORE the claim?
6. No record -> withdraw the claim

mini_check_l2.py: 7/7 PASS · corpus: 100 files · result: band 0 matches
